To,
The Director
State Council of Education Research and Training
Government of State

Subject: Request for the statewide dissemination of Information regarding National Olympiads 2026 (NSO, NMO & NEO) to all Government, Government-aided, and Private Schools of Government of the State.

Respected Sir/Ma'am,

Warm greetings from the **Indian Education Council (IEC)**.

We are pleased to apprise your esteemed office that the Council will be conducting the **National Olympiad 2026** for the academic session **2026–27**, comprising **National Science Olympiad (NSO)**, **National Mathematics Olympiad (NMO)** and **National English Olympiad (NEO)**. This initiative has been thoughtfully developed as a comprehensive academic platform to recognize, encourage, and advance scholastic talent among students across diverse educational institutions in India.

The Olympiads will adhere to the **latest NCERT guidelines** and reflect the vision outlined in the **National Education Policy (NEP) 2020** along with the **National Curriculum Framework (NCF) 2023**. The assessment structure is designed to move beyond conventional testing by emphasizing **conceptual depth, logical reasoning, and application-based learning**.

India's longstanding commitment to educational excellence inspires us to create opportunities that empower young learners. Through this program, the Council endeavors to establish an **inclusive and merit-driven academic ecosystem**, enabling students from varied backgrounds to participate, compete, and excel.

In addition, as part of academic enrichment and national exposure, **meritorious students** will be provided an opportunity to participate in an educational visit to the **Indian Space Research Organisation (ISRO)**, aimed at fostering scientific temperament, innovation, and experiential learning. The Council is committed to ensuring equitable access and broad participation, thereby contributing to the development of a robust academic culture across diverse school systems

Considering the esteemed academic role of **State Council of Educational Research and Training** in strengthening school education and academic outreach, We humbly request SCERT to kindly consider facilitating the **dissemination of information** regarding **IEC National Olympiads 2026 (NSO, NMO & NEO)** among Government, Government-aided, and Private schools through its appropriate academic communication channels and to **circulate** the initiative to DIETs and district academic authorities for wider awareness and participation. **We would be deeply honored if your esteemed office could also extend a message of encouragement, which will serve as a source of inspiration for students, educators, and associated schools with this initiative.**

We firmly believe that with the academic goodwill and guidance of SCERT, this initiative can reach a larger student participation and contribute meaningfully to strengthening mathematics education across the state.

Detailed brochure containing comprehensive information about the National Olympiads is enclosed herewith for your kind perusal.

With sincere regards,

Kapil Kumar Sharma
Director General
Indian Education Council
